THIS IS UNEVALUATED INFORMATION

25X1 1. Cement, with an annual output of 251,000 tons, is the main product of the
 25X1 Prvolovac factory, while oxygen is a by-product. The factory employs
 575 workers, 100 clerks, and 19 students, and has the following
 equipment:

- 3 rotation furnaces
- 4 Gruber furnaces
- 1 Gruber furnace, operating since the summer of this year
- 4 cement mills
- 2 Diesel electric units of 400 kilowatts each
- 2 Diesel electric units of 100 kilowatts each

2. The factory lacks spare parts, which, to a great extent, have to be
 imported from abroad. The Gruber furnaces and the mills are made up
 of old parts. The power machinery, sixty percent of which was
 destroyed during the war, was renewed only this year.

3. Electric energy is supplied to the factory by way of a long distance
 conduit from the Tito power station near Omis. The factory is also
 connected with the "10 October" and "Partisan" power stations.

25X1 4. Output of the factory is designed to meet the requirements of Yugoslav
 exports [REDACTED] in turn for which Yugoslavia would receive
 raw materials, especially leather.
